

Leave NJ's Do Not Call List alone! Consider making the Federal Law as stringent. Telemarketers have for years been loathed by me because they are intrusive and often rude. Even after you politely say NO, they insist on not letting you hang up. Often, asking to be taken off their list does not stop the calls. Ever since my numbers were submitted to the do not call registry, it has been so much quieter and peaceful. Advertisers can still send junk mail; lets leave it at that and leave my phone for the calls that matter, my families, friends, emergencies etc. If I want a product, I will go out or make the call to get it.
